SUMMARY

Results-driven full-stack developer with over 4 years of experience specializing in React.js, Node.js, and PostgreSQL. Demonstrates strong problem-solving skills, ownership of the end-to-end development lifecycle, and a proven ability to deliver scalable, high-quality products. Experience working in agile teams, contributing to complex web applications, and leading initiatives to improve performance and code quality.

TECHNICAL SKILLS

Front-End Development: React.js, Redux, JavaScript (ES6+), TypeScript, HTML5, CSS3, Angular, Next.js, Vite, Tailwind CSS, Material UI (MUI), Ant Design, Bootstrap

Back-End Development: Node.js, Express.js, RESTful APIs, MongoDB, NestJS, PostgreSQL, Prisma, Kafka, Redis

DevOps, Tools & Testing: Docker, Jenkins, Git, GitHub, AWS, Heroku, Vercel, Jest, Webpack, Babel, Postman, Jira

EXPERIENCE

Full Stack Developer

Nov 2021 – Present

io-market software services

Kochi, Kerala

- Developed modular, reusable React components and implemented Redux for state management, improving maintainability.
- Led development of a CMS platform that increased website deployment efficiency by 80%, managing the end-to-end SDLC.
- Enhanced ERP software by integrating REST APIs for seamless data exchange, increasing system stability.
- Integrated Saferpay for secure payment flows and implemented role-based authentication with JWT.
- Mentored junior developers and actively participated in Agile ceremonies (daily standups, sprint planning, retrospectives).

Full Stack Developer Intern

Sep 2021 – Nov 2021

TCS ION

Kerala

- Built a course management system with role-based access, enrollment tracking, and progress monitoring.

Full Stack Developer Trainee

Feb 2021 – Aug 2021

ICTAK

Kerala

- Developed a job portal with secure authentication, job search functionalities, and intuitive UI.
- Built a library management application with CRUD features and role-based permissions.

PROJECTS

Proffix ERP System

- Developed and maintained ERP software to track all business transactions.
- Integrated with Gate2B (EDI system) to automatically process and capture transaction data in real-time.
- Designed and implemented a scheduler module for automated generation of electronic data.
- Enhanced performance and ensured system reliability for high-volume transaction processing

Archive Management System

- Designed a Google Cloud-like interface for managing and listing processed electronic records.
- Ensured high data integrity and seamless access for stakeholders.
- Implemented role-based authentication with JWT for 100+ clients.

Billing & Payment Management System

- Developed subscription billing and payment workflows with Saferpay integration.
- Implemented secure handling of user data, logging, and monitoring.

Developer Application

- Built a centralized hub for developers integrating with internal APIs.
- Designed an interface displaying API documentation, authentication keys, and live references.

EDUCATION

NSS College of Engineering

Palakkad, Kerala

Bachelor of Technology in Electronics and Communication

Aug 2016 – Aug 2020

CERTIFICATION

- Certified Specialist in Full Stack Development - ICT Academy of Kerala
